## **Work-family conflict (WFC)**

“a form of inter-role conflict in which the role pressures from the work and family domains are mutually incompatible in some respect”  
(Greenhaus & Beutell, 1985)

Previous studies - What do we know ?

- Single-parents have more WFC than still married parents
- Explanation: resources
  - Less financial means
  - No partner to rely on
  - Different job characteristics (more precarious)

## Previous studies

- WFC already studied in intact and broken families.
- BUT: *is the comparison made correctly?*

## Comparing WFC across family constellations

- Divorced families ≠ Single-parent families

Life does not end with a divorce

Repartnering is on the rise

- Single parents are not a uniform social category

Shared Physical Custody is on the rise

Full-time vs. part-time single parenthood

Comparing WFC across family constellations

# Hypotheses

## Marital status

Married  
Divorced

Divorced parents experience more WIF than married parents

Divorced parents experience more FIW Than married parents

# Hypotheses

## Relationship status

Single  
Couple

H2a

Singles experience more WIF than coupled parents

H2b

Singles experience more FIW than coupled parents

## **Marital x relationship status**

Single  
Repartnered  
Married

**H3a**

Singles experiences the most WIF,  
followed by repartnered and married  
parents

**H3b**

Singles experiences the most FIW,  
followed by repartnered and married  
parents

**Gender**

Mothers will experience more WIF than divorced fathers

Mothers will experience more FIW than divorced fathers

## Dataset

Divorces In Flanders (DIF)

2008

Flanders, Belgium

Multi-actor survey

## Subsample

Employed divorced parents  
( $n = 1754$ )

Logistic regression analysis

## **Control variables**

Respondent's age

Educational level

Number of children

Age of the youngest child

Parental divorce

Household income

Working hours

Household income

## FAMILY MODELS

- Male breadwinner model
- Dual earner model
- Single parents

## FAMILY MODELS

- Couple (married or cohabiting) with children
- One-sided new constellated family
- Two-sided new constellated family
- Part-time single parent
- Full-time single parent

## FAMILY MODELS

- Couple (married or cohabiting) with children
- One-sided new constellated family without children in the new relation and no LAT in the other relationship
- One-sided new constellated family without children in the new relation and LAT in the other relationship
- One-sided new constellated family with children in the new relation and no LAT in the other relationship
- One-sided new constellated family with children in the new relation and LAT in the other relationship
- Two-sided new constellated family without children in the new relation
- Two-sided new constellated family with children in the new relation
- Part-time single parent without new partner
- Part-time single parent in LAT
- Full-time single parent
- Full-time single parent in LAT

## FAMILY MODELS

- Couple (married or cohabiting) with children
- One-sided new constellated family without children in the new relation and no LAT in the other relationship
- One-sided new constellated family without children in the new relation and LAT in the other relationship
- One-sided new constellated family with children in the new relation and no LAT in the other relationship
- One-sided new constellated family with children in the new relation and LAT in the other relationship
- Two-sided new constellated family without children in the new relation
- Two-sided new constellated family with children in the new relation
- Part-time single parent without new partner
- Part-time single parent in LAT
- Full-time single parent
- Full-time single parent in LAT

HER

- Couple (married or cohabiting) with children
- One-sided new constellated family without children in the new relation and no LAT in the other relationship
- One-sided new constellated family without children in the new relation and LAT in the other relationship
- One-sided new constellated family with children in the new relation and no LAT in the other relationship
- One-sided new constellated family with children in the new relation and LAT in the other relationship
- Two-sided new constellated family without children in the new relation
- Two-sided new constellated family with children in the new relation
- Part-time single parent without new partner
- Part-time single parent in LAT
- Full-time single parent
- Full-time single parent in LAT

HIS

- Taking family diversity into account is necessary but requires detailed data
- Also in our analysis: Custody arrangements need to be added to the analysis
- Next step: Looking at “family enrichment” (LSAC data)
